

Case Study

Student Lounge Seating

School districts are constantly looking for ways to not only enhance their student’s learning, but make a statement with the design of buildings and classrooms. This client asked our team to create a colorful, comfortable, and unique classroom, in a non-traditional fashion. The school needed furniture that integrates well into their current building, was interactive and mobile, and inspired their students to be great!

Our Studio Team was provided napkin sketches from the dealer and school officials. Renderings, fabric samples, and ideas were in constant exchange to ensure the needs of the school were met. Teachers were thrilled with the results that paralleled precisely what their new curriculum is hoping to accomplish.

The lounge seating offers students an escape from the standard classroom set-up. Here, students have the ability to study in groups or individually, as well as the choice learn in an area of the class that is most comfortable for them. Although most of the furniture shown are not standard products, Vanerum•Stelter has the flexibility to create custom pieces to fit the precise needs of the customer.
