

The power hub conceals wires in the cylinder base.

3form inlay adds to the movement and flow of the wave table.

Power is available for each user who sits at the table.

Hub and Wave Tables

SITUATION

A modern look and plenty of power were the needs of this university's library. Once the design firm designed the collection of powered tables, a manufacturer was needed.

RESULT

The design firm provided us with the drawings and specs. We engineered and manufactured the extra large tables made of 3form and veneer for a flawless finish.
