

GOODWIN COLLEGE: LIBRARY

Goodwin College was founded in 1999, having evolved from Data Institute Business School, a career training school that had operated in East Hartford, Connecticut since 1962. They continue to attract and retain students in part by focusing on updating and upgrading their wonderful facilities. The college approached Vanerum•Stelter and the local dealer with a need to outfit their classrooms, library and commons area with new, innovative furniture solutions.

Within weeks, the school was filled with Vanerum•Stelter product solutions. A complete library was installed that included laminate shelving, study tables and carrels. The commons area and some classrooms were filled with Baye and Coolee tables. Innovative Optimax seating and desking products were provided for the remaining classrooms.

The result: a delighted customer with a facility filled with innovative product and an installation that went off without a hitch.
