10' MODEL

Width: 120"
 Worksurface Depth: 30"
 Footprint Depth: 58"

12' MODEL

Width: 144"
 Worksurface Depth: 30"
 Footprint Depth: 58"

WORKSURFACE SPECIFICATIONS

- 3/4" particle board core with high pressure laminate worksurface and radius corners
- Edge is sealed with polyurethane composition treatment to provide sealed edge
- Top is secured to frame with #10 x 3/4" screws, 9" on centers

BASE SPECIFICATIONS

- Torsion control springs and bars for easy lift and adjustability
- 14 gauge self-supporting, MIG welded, unitized frame
- 1.25" and 1.5" steel tubing
- Lock plates are 8 gauge steel, laser cut to exact tolerance
- Aprons are 2" high and C-shaped, made of 14 gauge steel
- All assembly points are attached with grade 5 hex machine bolts
- Metal is finished with epoxy powder coat

CASTER SPECIFICATIONS

- Table rests on six 4" x 1.25" wide rubber, non-marring, ball-bearing swivel casters

SEATING SPECIFICATIONS

- Seats are made of high-impact polypropylene
- Mounted directly on 6" square, 8 gauge steel plates
- Laminated bench seating also available, secured with 5/16" bolts
